

EDITORIAL POLICY

Revue d'études autochtones is an international French language journal published in Québec since 1971. The articles published in the journal relate to First Nations of Québec, Canada, USA and Latin America. The journal is triannual and is under the supervision of a Director supported by members of an Editorial Committee.

The main disciplines which the journal is interested in are: social and cultural anthropology, applied anthropology, social and cultural archaeology, ethnohistory, ethnography, ethno linguistics and Indigenous ethno science, and finally legal, political and economic sciences relating to Indigenous affairs. The journal is open to all theoretical currents and all intellectual traditions.

The Editorial Committee invites researchers to submit thematic proposals or articles. Before contacting the Journal or the Editor, researchers are encouraged to consult the Guide to Theme Issues and the Guidelines for Authors.

PEER REVIEW PROCESS

Revue d'études autochtones fully supports the principles of anonymous peer review. Any manuscript submitted to the journal *Revue d'études autochtones* for publication (an article or a research note) is first submitted to the Editorial Board, which judges its admissibility. The texts considered admissible are then peer reviewed by at least two recognized experts (external readers) who are selected from the international scientific community. This peer review process is completely anonymous. The selection of reviewers is the responsibility of the Editorial Board, which acts under the supervision of the Director.

The main criteria for evaluation are: interest and originality of the subject; the quality of the conceptual framework, the methodology and documentation used, the quality of the style and language as well as the overall structure of the article. An evaluation sheet is sent to external readers.

Any manuscript submitted for publication may be: (1) refused; 2) accepted with major revisions; 3) accepted with minor revisions or; 4) accepted as submitted. In case of major revisions, the

Editorial Board reserves the right to re-submit the revised version of the article to an external reviewer.

In the event of conflicting reports from external reviewers, the Committee will use a third evaluation. If there is no agreement among the members of the Editorial Board following receipt of the divergent evaluations, a sub-committee of three persons (from the Editorial Board) will be formed and the final decision will be taken after reviewing and re-reading all external evaluations and the opinions of the Editorial Board members.

COPYRIGHT

The author remains the copyright holder if his/her text is published in *Revue d'études autochtones*. However, we ask the author to sign an agreement that confers to the journal an exclusive first-time license and a non-exclusive license to reproduce and distribute the full text or extracts from the text. By publishing in RÉA, authors agree that the journal grants a Creative Commons CC BY-ND 4.0 ([Attribution-NoDerivatives 4.0 International](https://creativecommons.org/licenses/by-nd/4.0/)) license that allows people to copy, reproduce, distribute, and transmit copies of your articles. However, articles must be cited with reference to the original authors and include the permanent URL of said document in the reference.

DIFFUSION AND OPEN ACCESS

Revue d'études autochtones adheres to the Directory of Open Access Journal (DOAJ) definition of open access. Authors are not charged a publication fee for publishing their article in the RÉA Journal. Its contents are therefore available in immediate open access on the Érudit platform and the attribution of the CC BY-ND license confers to its readers rights of use without technical barrier such as reading, downloading, copying, distributing, printing the full text of the articles, searching within them, or referring to them through hyperlinks, as well as dissecting them for indexing, using them as data sets for software, or using them in any other legal manner. The Creative Commons license that is attributed to the final version of the author's manuscript (Version of Record) allows it to be self-archived as soon as it is published on Érudit or the journal's website. The author who publishes in RÉA agrees not to self-archive the Preprint (Author's Accepted Manuscript versions) of his/her text.

Digital Preservation

Revue d'études autochtones is permanently archived on Portico.

PUBLICATION ETHICS POLICIES

Anti-plagiarism Policy

In order to protect the authors' rights and to ensure the unpublished nature of the texts it publishes, *Revue d'études autochtones* journal has adopted an anti-plagiarism policy. As a general rule, the quality of anonymous peer-reviewers makes it possible to avoid plagiarism. The Journal considers as act of plagiarism the fact of:

- appropriating, in whole or in part, the work of others by passing them off as their own and / or without mentioning the source;
- copying, in whole or in part, his/her own work already published, without mentioning the reference to the original publication (self-plagiarism);
- summarize the original idea of an author by expressing it in his own words, but by omitting to mention the source.

If a case of plagiarism is detected **before** publication or if there is a serious doubt, the author will be immediately contacted and informed. If the plagiarism is minor, the author must rewrite and quote correctly its sources and include the exact references. If the plagiarism is more substantial (25% of the text and more), the article will be automatically rejected.

If a case of plagiarism is detected **after** publication, the article will be removed from the digital version of *Revue d'études autochtones* and, for the sake of transparency, an editorial note will be inserted in the paper version of the following issue.

If an article is refused or withdrawn due to plagiarism, its author will no longer be able to publish in *Revue d'études autochtones*. The Journal's decisions regarding plagiarism are final.

Scientific integrity and artificial intelligence

Artificial intelligence (AI) systems may not be identified as authors or co-authors of articles submitted for publication to Journal of Native Studies. If artificial intelligence was used in the writing of the manuscript or in the production of visual or graphic elements, authors must specify

and justify this in an appropriate section of the manuscript. In the event of such justification rendering the manuscript admissible, authors assume responsibility for verifying the veracity of content and sources, and undertake to respect the intellectual property associated with such content.

Transparency and Best Practice

Revue d'études autochtones journal adheres to the principles of transparency and good scholarly publishing practices as advocated by four major scholarly publishing organizations ([COPE](#), [DOAJ](#), [OASPA](#) et [WAME](#)).
